EXPLANATION.

EXPLANATION. HOOPLANDS GERMAN BITTERS is entirely vegetable, and contains no liquor. It is a compound of Fluid Extracts. The Roots, Herbs, and Barks from which these extracts are made, are gathered in Germany, all the medical virtues are extracted from them by a scientific chemist. These extracts are then forwarded to this country to be used expressly for the manufacture of this Bitters. There is no alcoholic substance of any kind used in compounding the Bitters, hence if free from all the objections inclident to the use of a liquor preparation.

The Intelligencer.

The census of 1870 will cause som

important changes. In 1840 the West was represented in Congress by thirty members; and after 1870 it will have eighty-two. In the Eastern States very different result will be produced. Those States in 1840 had thirty-eight members; their representation will be but twenty-two after 1870. In 1846, the Atlantic Eastern States, as divided from the Scuthern, had one hundred and nineteen Congressmen; after 1870, they will have but eighty-six. More than one-third of the next House of Representatives elected after the census of 1870, will be from the West, and united to the Southwest, will constitute a clear majority of the members of that body as well as of Presidential electors.
When the census shall be taken and apportionment made for the first time in accordance with it, the South will have a full representation upon the negroes instead of three-fifths of them as now and heretofore. By this the South will gain thirteen members at least.

The Methodist Voteon Lay Delegation

The laity of the Methodist Church have decided in favor of lay delegation. The returns of the vote are not yet completed, but enough is known to show that the vote will be but little more than ten per cent. of the whole membership, and that of the whole vote about two thirds will be in favor of lay delegation. The opponents of the measure lay much stress on the meagre ness of the vote, and claim that the non-voting portion are opposed to or at however, generally conceded to be decisive in favor of the new law. Virginia and the Fifteenth Amend. ment. The New York Commercial Adver-

iser having said there was no guaranty that the Virginia Legislature would ratify the Fifteenth Amendment unless the test oath were enforced, the Richmod Whig says:
"We have declared time after time,

J in the most emphasic manner, that General Assembly of Virginia will, soon as possible after it is permitted convene, proceed to the ratification the amendment in question. We we never entersimed a shadow of have never entertained a shadow of doubt on the subject, and certainly could never have written a line or syliable suggesting such a doubt. This has been the pivotal point of every argument we have made on the subject, and has been urged as the great reason (teaving good faith and fair dealing out of view) why our General Assembly should be allowed to assemble and set without being trammelled by the test-outh. We may here add that we do not believe that a solliary Walker member elect of that body will hesitate a moment about voting to ratify the member elect of that body will hesitate a moment about voting to ratify the Fifteenth Amendment. We have endeavored to show that the object of the reconstruction measure was to promote loyalty in the South, and to induce those called 'ex-rebels' to accept and ratify the Constitutions embodying the conditions and requirements that Congress prescribed as essentials to their reconstruction. It is shown by Gen. gress preactions. It is shown by Gen. Canby's official returns that out of 219.671 votes cast in our election, all but 9.136 were given for the Constitution. Is it not a self-evident proposition that those who voted to ratify a Constitution establishing universal suffrage and equality of political rights in this establishing universal suffrage and equality of political rights in this State, will, in the same unhesitating manner, tavor the ratification of the Filteenth Amendment, which only extends to other States the principle thus applied to Virginia? To refuse this after doing that would be unmixed folly.

THE SUCCESSION.

There is considerable speculation afloat as to who will fill the vacancy, as it is conceded that the poat is too important to be left unfiled at this juncture. Among the names prominently mentioned are those of General Granville M. Dodge, of the Union Pacific Railroad, and Gen. Logan. In the West the former is known to have planned an extended visit to the Celestial Empire, following Minister Burlingame's an extended visit to the Celestial Empire, following Minister Burlingame's return to Pekin. His projected visit is understood to relate to a proposed railroad movement there. Logan, it is believed, would like the appointment. Hon. William B. Mann, of Philadelphia, is to be urged by the parties interested in the East India Telegraph Company of which Governor Cartin is President. The other names presented are tiose of Hon. John D. Baldwin, editor of the Worcester, Massachusetts, Apy, and recently a member of Coneditor of the Worcester, Massachusetts, Spy, and recently a member of Congress from that State, and that of John Rossell Young, recently of the Tribune. General Canby recently distinctly de clared to a brother of Gov. Walker, of Virginia, his latention and purpose to enforce the test oath upon the members of the Legislature, saying Virginia could not be regarded as a State de facto until after her Senators are elected and admitted to their seats. NEW YORK, August 30.

The Tribune's London special, speaking of the international race, says: "They were beaten for many good reasons. In style, form, knowledge of rowing, diet, method of training, mode of instruction the Harvards were utterly inferior to the Oxfords. Had the race been won by them the credit would have belonged to Loring, the captain, and the defeat of his crew being the case, he must equally bear the blame. A man of extreme self-reliance, which partiality neutralizes his high qualities of intelligence, generous devotion and capacity, but experience limited by knowledge of American rowing, he persisted in adhering to American methods. He would cosch crew himself from Inside of the boat, a thing radically impossible to do; he would not change the diet of the oraw although the climate-required a change of diet which manifestly impaired his own and Simmons' powers. It is sheer madness to go on eating currants and milk in this or any climate, but even diarrhoea and other symptoms could not effect a change in the Captain's stubborn opinion. From the Albion of Saturday The Gold Room has attracted a good deal of attention during the week, and

ig however to 1824 and then to 1844; to-day. The Erie party and Mr. Kimber, the latter representing Sierne Brothers & Oo., of London, are supposed to be the leading bulls, and they are making capital out of the undoubtedly large 'short' interest which has been latterly created in the market as well as the proposed purchase of Oubs by the United States. There are no aigus of gold having been locked up, however, for the floating supply is so abundant that from one to five percent, is paid for having it carried, so that the bears have no difficulty in borrowing to make their deliveries. Should the Government at Washington be unwise enough to purchase the Island referred to, the bad effect upon the National finances would be reflected by an advance in the gold premium,

for hesides swelling the aggregate of the National debt the Customs receipts of the country would be largely reduced. The products of the Queen of the Antilles would then yield a comparatively small amount by taxation under the Internal Revenue Act, and serious doubts as to the ability of the Government to pay the interest on its gold bearing debt would be likely to arise in the public mind whether Juslified or not by the probabilities of the case, It is therefore to be hoped that the proposed purchase will not be con-Miscellaneous.
